

DCFS BILLBOARDS

The billboards featured on the home page are part of a 2008 campaign to bring public awareness to reporting child abuse and the need for adoptive and foster parents.

DCFS acquired approximately 85 free pole-sign billboards through a partnership with the non-profit organization Project Nightlight, which focuses on child abuse prevention, and Vista Media, who generously agreed to donate the billboard space and installation. Project Nightlight fully funded the printing cost and all of the photography/art design. Vista Media and Project Nightlight have sponsored this campaign for the department annually since 2006. The billboards are being rolled out throughout Los Angeles County.

The models featured on the report child abuse billboards are DCFS Children's Social Workers. All volunteered their time to be a part of this campaign. DCFS would like to extend special thanks to the social workers for assisting with this project.
